1 Returns for less than one year are not annualized.

2 Includes maximum 5.75% front-end sales charge.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted.

Performance data for all share classes current to the most recent month end may be obtained by calling 800 523-1918 or visiting delawarefunds.com/performance.

Total returns may reflect waivers and/or expense reimbursements by the manager and/or distributor for some

or all periods shown. Performance would have been lower without such waivers or reimbursements.

Performance "at NAV" assumes that no front-end sales charge applied or the investment was not redeemed. Performance "at offer" assumes that a front-end sales charge applied to the extent applicable.

Prior to Aug. 1, 2005, the Fund had not engaged in a broad distribution effort of its shares and had been subject to limited redemption requests. 12b-1 fees were waived for this period. Had 12b-1 fees been applied, performance would have been lower. Expense waivers were in effect for the periods shown. Performance would have been lower if waivers did not apply.

Expense ratio

	Gross	Net
Institutional Class	0.93%	0.93%
Class A	1.18%	1.18%
Class C	1.93%	1.93%
Class R	1.43%	1.43%
Class R6	0.79%	0.79%

3 Source: FactSet 4 P/E ratio is a valuation ratio of a company's current share price compared to its earnings per share. In this case, P/E is calculated using consensus forecasted earnings per share for the fiscal year following next. 5 Beta measures the security's volatility in relation to its benchmark index. 6 Annualized standard deviation measures historical volatility of returns. 7 Active share refers to the percentage of a fund's portfolio that differs from its benchmark, and is measured on a scale from 0% to 100%. The higher the active share measurement, the lower the portfolio overlap with its benchmark.

Delaware Small Cap Core Fund

Growth of \$10,000 (Institutional Class shares) **\$31,822 (current value)**

Past performance is not a guarantee of future results. The "Growth of a \$10,000 investment" graph assumes \$10,000 invested in Institutional Class shares of the Fund on June 30, 2008. Performance assumes reinvestment of all distributions and does not account for taxes. Expense limitations were in effect for some or all of the periods shown. Performance would have been lower had expense limitations not been in effect.

Portfolio composition⁸

Domestic equities	95.5%
Cash and cash equivalents	2.5%
International equities & depositary receipts	2.0%

⁸ Total may not equal 100% due to rounding.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and other information can be found in the Fund's prospectus and summary prospectus, which may be obtained by visiting delawarefunds.com/literature or calling 800 523-1918. Investors should read the prospectus and summary prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. • Narrowly focused investments may exhibit higher volatility than investments in multiple industry sectors. • Investments in small and/or medium-sized companies typically exhibit greater risk and higher volatility than larger, more established companies. • REIT investments are subject to many of the risks associated with direct real estate ownership, including changes in economic conditions, credit risk, and interest rate fluctuations. • International investments entail risks not ordinarily associated with US investments including fluctuation in currency values, differences in accounting principles, or economic or political instability in other nations. Investing in emerging markets can be riskier than investing in established foreign markets due to increased volatility and lower trading volume.

Index performance returns do not reflect any management fees, transaction costs, or expenses. Indices are unmanaged and one cannot invest directly in an index. The **Russell 2000 Index** measures the performance of the small-cap segment of the US equity universe. The Russell 2000 Index is a subset of the Russell 3000[®] Index, representing approximately 10% of the total market capitalization of that index. The **Morningstar Small Blend Category** compares funds that favor US firms at the smaller end of the market-capitalization range. Some funds in this category aim to own an array of value and growth stocks while others employ a discipline that

leads to holdings with valuations and growth rates close to the small-cap averages.

Institutional Class shares rated 4, 5, and 5 stars and Class A shares (load waived) rated 4, 5, and 5 stars for the 3-, 5-, and 10-year periods ended 6/30/2018 among 639, 539, and 393 Small Blend funds, respectively. There are 639 funds in the overall rating.

The Morningstar Rating[™] for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Morningstar Rating is for the Class(es) indicated; other classes may have different performance characteristics.
